Iterations on the High Fidelity Models

For this iteration, I decided to make the modifying settings easier via plus and minus buttons. I also worked to make the price clearer and differentiate how people can easily remove items from the cart. Finally, I worked to incorporate a more easily identifiable top-line navigation.

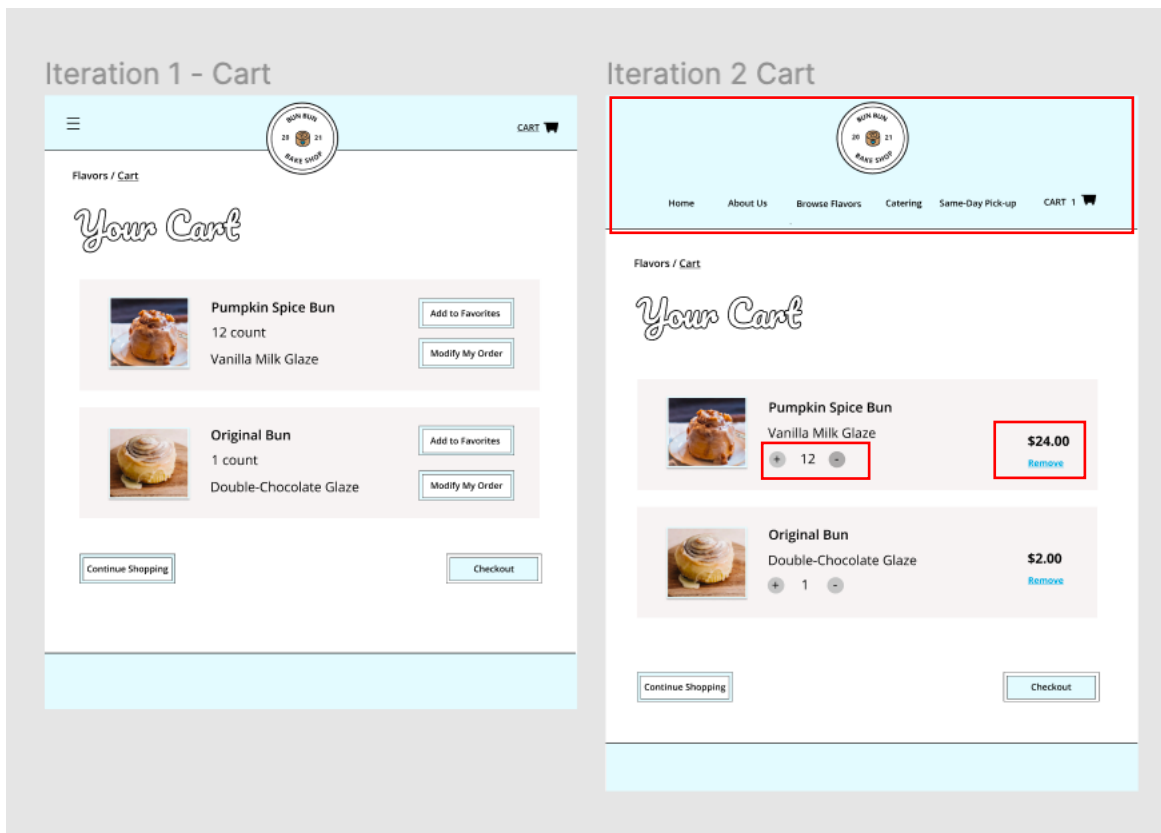

Figure 1. Iteration 1 and iteration 2 of my high-fidelity cart design, red-lined to indicate changes.

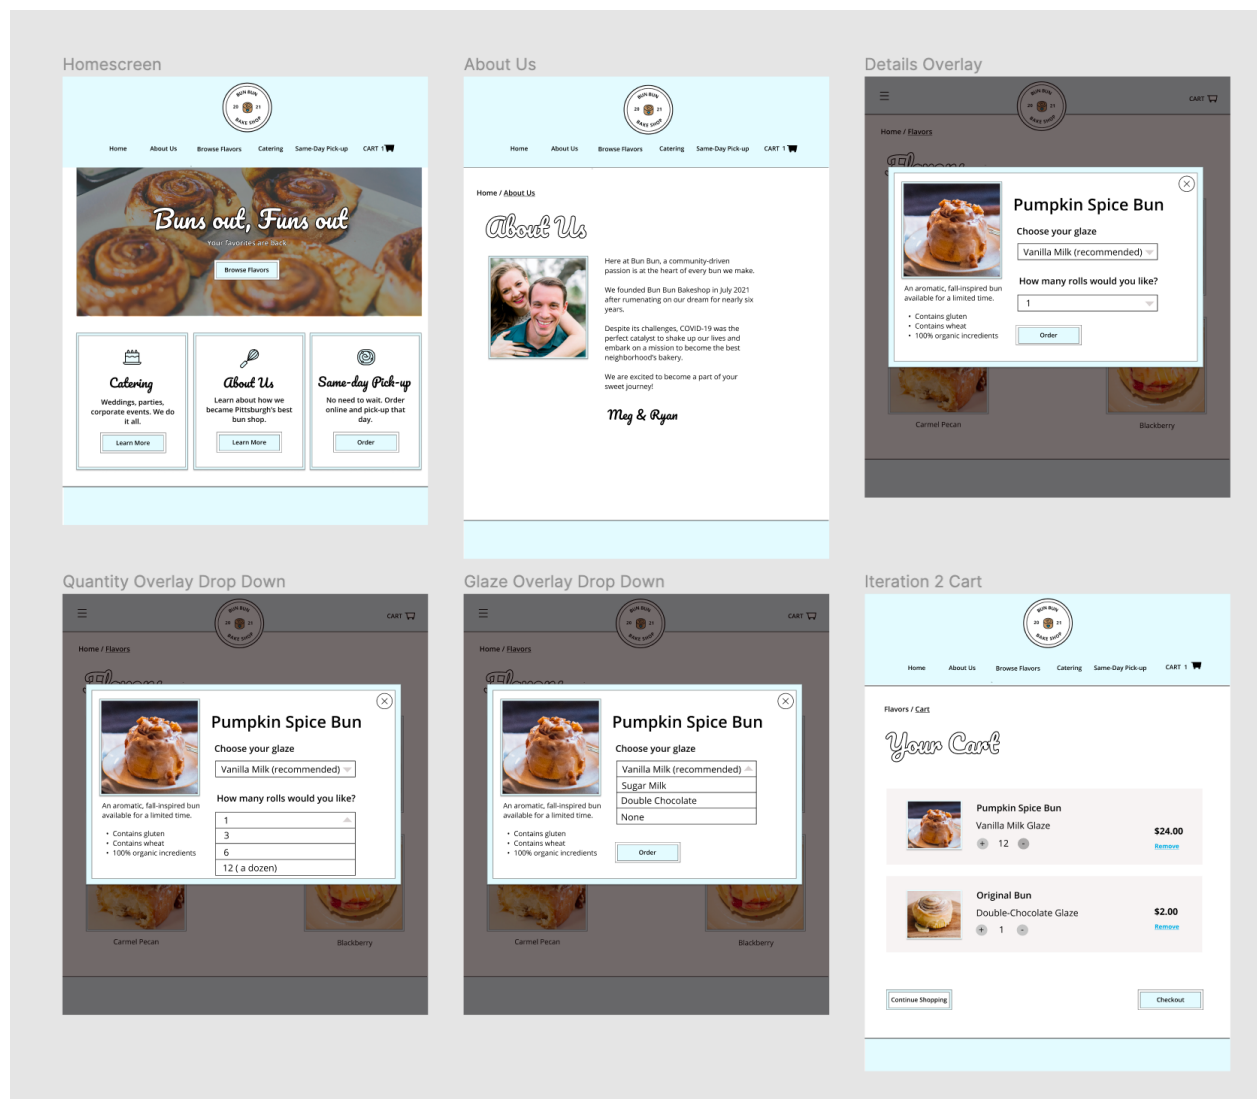

Figure 2. The full design for Homework 6A.
